## Hold Fourth Annual Flower Show

Champion district is to be congratulated on the increased number of varieties of flowers grown since the first flower show in 1928, as evidenced by the showing made in the Community Hall on Friday, August 22nd. Although the entries did not exceed those of previous years, the quality was such that the judges had a difficult task to make their awards and some special prizes had to be given. The prize winners follow:

Best collection of house plants of any variety, in bloom—1st Mrs. Alexander, 2nd Mrs. Beaubier.

Best collection for table bouquet—1st Mrs. Boner, 2nd Mrs. Stephenson.

Pennants—(Special donated by Mrs. Brown McDonald), 1st Helen Farmer, 2nd Mrs. Beaubier.

Best collection of sweet peas—1st Mrs. Boner, 2nd Mrs. Summers.

Best collection of sweet peas, any variety—1st Mrs. Summers.

Godeita—1st Mrs. Boner.

Stock—1st Mrs. Boner.

Aster, scattered—1st Mrs. Ferguson.

Asters, one color—1st Mrs. Ferguson.

Marguerite—1st Mrs. Stephenson.

Torenia—1st Mrs. Boner.

Fancy collection—1st Mrs. Boner.

Phlox collection—1st Mrs. Alexander.

Sunflowers—(Special) Mrs. Luchia.

The committee in charge of the aprons for the bazaar wish to remind those who have aprons and are donating them, to remember that the time is passing and to be sure and have them finished. They may be handed in to Mrs. U. G. Anderson.

Mrs. Helen Farmer left for Trochon on Wednesday where she will take up Grade XII work. She was accompanied by Mr. Farmer.

Mrs. W. Gorsche and her mother, Mrs. J. Castator, left for Calgary this week to visit relatives before Mrs. Gorsche returns to Vancouver.

## Little Bow Constituency Conference

Held in Champion August 22nd, 1930

Seventy-six officers, delegates and visitors met in the Community Hall at Champion for the W. I. Conference. On the platform were Mrs. Alcock, district director; Mrs. Martin, constituency convener, and Mrs. Bowie of Reid Hill, who acted as recording secretary.

After singing "The Maple Leaf," the audience was welcomed in a pleasing speech by the Champion president, Mrs. Bastin. The reply was given in a few bright, well chosen words by Mrs. Fitzpatrick of Reid Hill.

After the minutes of the last conference had been read and passed the financial report was dealt with. Little Miss Peterson of Vulcan recited. Mrs. Martin was very happy to tell that the Little Bow constituency had been able to report at the Calgary conference that every branch was fully paid up as to the constituency, district and provincial dues.

About this time some music by Miss Gladys Rhodes, violin, and Miss Margaret Patterson, piano, delighted the gathering. Then after hearing several delegations' reports adjournment was made to Mrs. Cowell's for chicken dinner.

In the afternoon the remaining reports were read, also the reports of the chairmen of the standing committees. Mrs. Reid of Kirkaldy and Mrs. M. S. St. John of Vulcan, and instrumental solos that were very enthusiastically received.

It was explained that each branch should elect chairmen for all the standing committees who should report to the constituency chairman what their branch did—if nothing was done the constituency chairman must be told that.

The following officers were elected for next year:

Constituency Convener—Mrs. Martin, Vulcan.

Child Welfare and Public Health—Mrs. Bastin, Champion.

Education and Better Schools—Mrs. Alexander, Vulcan.

Legislation—Mrs. Bowie, Reid Hill.

Household Economics—Mrs. Fitzpatrick, Reid Hill.

Immigration—Mrs. J. F. Hyde.

Canadianization and National Education—Mrs. Miller, Carmangay.

Agriculture—Mrs. Miller, Carmangay.

Canadian Industries—Mrs. Polk, Carmangay.

Each branch is to take up these subjects as suits them best.

Our station agent came in for the most praise that anyone got all day. That was in the Director's address. Mrs. Alcock endeavored to give us some idea how hard it is to plan an itinerary to cover the work of the finance committee, the constituencies that all like to have their conference, and the Provincial President too, who wish to visit the conferences all over the province. As there are four districts, conferences in Peace River and South Alberta are sure to come on the same day.

Things were rushed through, "God Save the King" was sung, and all went down stairs for refreshments in the banquet hall. This was charmingly decorated in pink and white, while the display of flowers helped to make it more interesting.

The next conference will be held at Carmangay.

D. Watkins threshed 40 bushels of No. 1 hard wheat per acre from a portion of his crop. This is getting quantity and quality very satisfactorily.

NOTES AND COMMENT.

To judge by the hundreds of suggestions being made to the government with regard to the solving of the labor problem there is going to be serious difficulties to overcome before any real progress is made in this matter, despite pre-election pledges. Extraordinary public works would be too costly to maintain, but so much of the money spent in this way goes to others than the actual workers that there is bound to be a limit to the issue of government and municipal funds in this way. The outcome of the special session of parliament to deal with unemployment will be watched with unusual interest.

The extent to which Russia will figure in the future of the wheat market is still a matter on which experts disagree. Late last year the Russian government have employed Thos. D. Campbell, the Montana wheat magnate, to show them how to grow wheat by factory methods and should he succeed in impressing his ideas on the Soviet leaders this might prove a considerable factor in the situation. There is no doubt Russia has the acreage and the disposition to use their conscripted labor to the utmost in their drive for wheat production.

The farmers as well as the unemployed are in the limelight these days and various plans to render them assistance are being advanced from many directions. The latest idea is to build up the livestock interests of the eastern provinces in order to absorb the grain surplus of western Canada. From other sources comes the advice to western Canada to build up a live stock trade of their own with their own grain. You pays your money and you takes your choice.

The Wheat Pool has been placed at 60 cents on the basis of No. 1 Northern at Fort Williams. That means 42 cents here. It is to wonder the plea of "stick tight" is made to members of the Pool. There is no assurance they will ever receive any further payment for this grain which was worth 60 cents per bushel on the street the day the amount of the initial pool payment was announced.

The first additional duty levied by the new government has been halted by general protests. This was an increase of the duty on fruit and vegetables from the United States. Fruit and produce houses from Winnipeg to Calgary protested vigorously with the result that an extension of time has been granted before the increase comes into effect.

A speaker at the gathering of the British Medical Association in Winnipeg ridiculed the advertising claims made for manufactured food products, classing them as "mostly bunkum." It

would appear from this that calories and vitamins may be largely ignored in the choice of foods and anything tempting to the normal appetite is just as likely to prove healthful as the brand of food for which such wonderful claims are made.

**United Grain Growers Limited**

A division of 6 per cent per annum has been declared upon the paid-up capital stock of United Grain Growers, Limited, for the financial year ending July 31st, 1930. Dividends will be mailed on September 1st, 1930, to shareholders of record as of the close of business July 31st. By order of the Board of Directors.

REV. F. A. DUENSING, Pastor

**Almost Obsolete  
the ice pick . . .**

And now, instead of hacking away awkwardly while splinters of ice fly here and there . . . you simply lift out the tray full of frozen cubes. They're just the right size, easily handled, always ready.

Now, too, you can have your frozen desserts ready in the short space of time it takes to prepare dinner . . . put them in the freezing compartment of the Electric Refrigerator when you start, and at dinner time they are perfectly frozen.

Convenient, of course. But more than that . . . a health essential. For medical authorities now say perishable food is safe from spoilage only when kept in a temperature of below 50 degrees. The dry cold of the Electric Refrigerator remains below 50 degrees the year round.

From every standpoint the Electric Refrigerator is an essential convenience to the modern housewife.

*A wide range of modern electrical appliances  
may now be purchased direct from the  
Calgary Power Company on a small down  
payment—balance to be paid with your regular  
utility bills.*

# Plan For Wholesale Emigration From Britain As Solution Of The Unemployment Problem

Wholesale emigration under the direction of public authorities, it is said, would give special concessions for buying or leasing large tracts of vacant land which would be developed with aid of the British and Dominion governments. The latest and newest scheme for a solution of the unemployment problem which is costing Great Britain \$700 per minute.

Horsemen's Union — "go west, young man, and become a 'go west' man" — for the plan embraces all parts of the Empire. The idea will be brought up at the forthcoming Imperial Conference in London, England, with the hope that the Dominions will approve the scheme and agree to a partnership with the Labor Government in finding a place for the estimated 2,000,000 persons unable to find work in the immigration question. Members of

The plan is a new approach on the part of the government that the old systems of homesteads and other preferential treatments of people were wholly ineffective under modern conditions and that the Dominions were also opposed to any haphazard theory which only swells the ranks of unemployed.

The scheme is therefore a pretentious plan to find a place for those at present unemployed who are not married. The union would go on in operation in accepting lands and the development of virgin territories would be left in their hands. The British and Dominion governments would also carry on a comprehensive plan to settle the new territory and emigrants would be furnished as man power for the markets needed to establish a new economic front.

The government is pushing the project for a new type of pioneer and the unemployment problem of the even claim the idea is a solution of Dominions as well as the proposed scheme. There would be no waste there as there is in England. It also claims that thousands are willing to leave immediately, but the uncertainty of employment holds them in England for their date.

It is understood that one Dominion has already endorsed the scheme. There is no anticipation of Britain or among the proponents trouble in finding investors in the event the plan is adopted.

## To Relieve Unemployed

Nearly 12,000 Extra Men Engaged By C.P.R. On Improvements From Canada

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's programme of construction, maintenance and repair of its fleet coast to coast. Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in "extra gangs" throughout its system. The work includes repairing and renewing of track lines; repairing and renovation of right-of-way, bridges, tunnels, stations, and other buildings. The men, in general, are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

## Increase Wheat Duty

An increase in duty on wheat imported into Italy put into effect recently has been satisfied by the farmers of the country from unprofitable prices has been reported by A. B. Muddiman, Canadian trade commissioner, in Milan, to the Department of Trade and Commerce. This is the second estimate of the value of about 1,000,000 tons of wheat in this year's harvest.

A motion picture screen which permits showing pictures outdoors and in lighted halls has been invented and by two French engineers.

"I have lost my biggest creditor"  
"Is he dead?"  
"No there was no help but to pay him"—Buen Humor, Madrid.

W. N. U. 1852

## Saskatchewan Egg Pool.

### Higher Prices Obtained This Season Over That Of Last Year

An increase in prices over those paid for the same period of 1929, is noted in the main payment of the Saskatchewan Co-operative Poultry Producers Limited, or Egg Pool. It is claimed that these prices (extras 22 cents; first 10 cents; second 17 cents) are the highest ever paid by the pool, who not only won the lead race in three straight heats from younger men, but stepped on up into the open competition of Class "C" and around the track Lake Ah. Marriott is affectionately known as "OL BILL" and drives a sleek, fast sea outfit, and is not only a superb rough water driver, but he skims the waves by a whisker and is not afraid to plow right into the turnoff to a big field. His work at the starts drew cheers every time he came up for the flag.

One of the outstanding features of the big fan meet at Swanset Beach, Puslinch Lake, recently, was the driving of Alex Wynn, the champion of Peterborough, Ont., who not only won the lead race in three straight heats from younger men, but stepped on up into the open competition of Class "C" and around the track Lake Ah. Marriott is affectionately known as "OL BILL" and drives a sleek, fast sea outfit, and is not only a superb rough water driver, but he skims the waves by a whisker and is not afraid to plow right into the turnoff to a big field. His work at the starts drew cheers every time he came up for the flag.

## Canada Holding Trade Position

### Dominion Maintains Place Among Leading Trading Countries Of The World

Ottawa, Ont.—Canada maintained her position among the leading trading countries of the world in the fiscal year ending March 31, 1930, despite a sharp decline in export trade and slight falling off in imports, according to the Royal Canadian Bureau of Statistics.

This is disclosed in the condensed preliminary report on the trade of Canada, 1930, issued recently by the Dominion Bureau of Statistics.

The year was marked by an unfavorable balance of trade of \$103,335,512 compared with a favorable balance of \$12,216,950 in 1929. This was attributed to the decline in the export of grain, particularly wheat, to the United Kingdom and continental Europe, due partly to low prices.

Canada's total trade in the last financial year was \$2,293,212,000 compared with \$2,634,975,000 in 1929. It is thus seen that while trade last year showed a slight decline from the year before, it was still in excess of the total in the year ending March 31, 1929.

Imports last year amounted to \$1,240,582,000 compared with \$1,196,691 in the previous year. The sharp decline in imports is indicated by the total figures of \$1,144,938,070 compared with the 1929 figure of \$1,348,070,000. The total value of exports was \$243,658,000 and the total imports was \$174,405,553, 17.6 per cent. for exports, and 14 per cent. for imports.

In export trade Canada leads the world in the export of printing paper, nickel, and asbestos; occupies second place in exports of automotive, meat and wheat flour; fourth place in the export of canned fruits, as well as a very high place in the world's exports of such staple products as lumber, fish, copper, raw fur, leather, meat, rubber tires, farm implements and raw gold.

**Interpreter Knows Job**

One of the busiest men in London this summer is W. Brewster, interpreter for a bus company, who directs people in their native language. Besides English, his own country, he speaks German, French, Italian, Danish, Swedish and Japanese. "I can even talk American," he said, "which is just as well, for any number of Americans here speak the need an interpreter in London."

**Put On Publicity Program**

In a further effort to bring before the people of the province the great variety of services of farms and factories, the Made-in-Manitoba Committee of the Industrial Development Bureau, is staging an extensive publicity programme.

Sidewalk cafes have been introduced in Havana.

## PRINCE OPENS NEW WORKSHOP

The photograph above shows Prince George officially opening door of new workshop at opening of Papworth Village settlement, near Cambridge, England, recently.

# Valuable Resources Going To Waste As Vast Quantities Of Natural Gas Are Burned In Air

## Free Correspondence Courses

### Boy And Girl In Saskatchewan

Educational opportunity for every boy and girl in Saskatchewan is the ideal towards the attainment of which the provincial Department of Education is steadily working. Notwithstanding the fact that the system of secondary education in high schools, collegiate institutes and in elementary schools, these schools do not meet the standards that the government has set down. Adequate provisions have been made by means of correspondence classes, to give a course of instruction to several hundred boys and girls who, for various reasons, are unable to attend the public or elementary schools. The next step is the inauguration of correspondence instruction in high school courses. Research is being done for the benefit of those who have no high school facilities, or who have physical disability, or who have vent their walking to school.

### Farm Boys and Girls

Canadian Juvenile Club Work Is Outstanding Among the Nations Of The World

The reported discovery of asbestos in a point in Northern Manitoba may broaden the range of Manitoba's natural resources and give the province leadership in asbestos production, which is already securely held by Canada. Canada produces about 74 per cent. of the world's asbestos, mostly in Manitoba, Quebec, and Ontario. Russia, about 15 per cent. and South Africa about six per cent., the remaining production being distributed in small quantities among Australia, Norway, France, and others.

Asbestos, although a mineral, consists of silk-like threads which can be spun and woven much as a textile. On account of its fire-proof qualities it is used extensively in building and manufacturing Canadian shipments, in 1929, amounted to \$66,032,000, and in 1930, valued at \$13,172,581, an increase of 12 per cent. in quantity over the previous year.

Planning, Saving, Investing

"To HAVE AND TO HOLD" when applied to money, does not seem to be an easy lesson for most people to learn. The word "and" is stressed because during the recent stock market slump there have been millions who have failed to do the "holding." They have emerged as losers. They have allowed the hue of speculation to divert their time and attention from their regular occupations and have lost the habit of activity about which they knew nothing to nothing. So it seems that most of us need to concentrate more on the "holding" part of our financial plan.

So writes Leroy D. Peavey, president of the well known S.A.L.A.D.A. Tea Co., in his article "How to Plan and Invest" which appears in every issue of the individual's life into roughly three parts. The first, from age twenty to age thirty, might be called the period of preparation or getting settled. The second, from thirty to the late fifties, is the period of accumulation. The third, from the late fifties on, is the age of retirement or rest.

No matter how much time and money may be expended during the teens and twenties in preparing young people for their life work, they can never, says Mr. Peavey, be independent during the last period of life unless they have made good use of those twenty-five or more golden years in the second period. It is during this period that one's surplus must be built up and logically planned if one hopes to be independent the rest of his days. His watchwords should be Plan, Save and Invest.

Planning means the making and using of a budget. The budget is the floor-plan of your financial structure. Fit it to your own situation and then stick to it. Don't deviate unless it is a couple of details. Of what are the specifications? And one of these specifications will be the proportion—whatever it may be of your income that is to be set aside for savings. Another specification will be the amount of your debts. If you can pay some debts, then they eventually will be free and clear. Because it is free of mortgages or other claims, it will stand between your family and distress. Life insurance and other sound investments should likewise be included.

The second watchword, "Saving," has been brought to the consciousnesses of the people of this generation by many years of educational effort. It has been taught that saving is the best way to accumulate wealth. It has been taught that savings accounts in post offices and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to "win the war," thousands of people who never before had invested in stocks or bonds, began to buy them. This was the first step toward saving it for money to accumulate and multiply through interest payments. But the lesson of saving is one that must be taught to each successive generation, and there should be no slackening in the effort. It is a lesson that all parents should see their children learn early in life, and continually practice until the savings habit is formed.

The third watchword, "Investing," is the choice between involving the almost unbelievable power of compound interest when harnessed to regular monthly savings, on one hand; on the other, putting the money into well seasoned securities. In the first case you need no particular advice, for it is true that compound interest is both tireless and automatic. In the second instance, that is, in investment securities, you need advice of the most discriminating sort. This fortunately, you can easily obtain from your own banker.

You will want to have among your investments some good sound bonds, anyway, and then if you also include personal, some of the best stocks. These should be in the safe, solid, well-known companies. Remember this, too. It is wise to keep a part of your funds in liquid form—that is, in cash or such short-term securities as can quickly be converted into cash. Then you will be prepared for emergencies. You might need this money to meet a sudden emergency or some special investment bargain in the market that had come to your attention.

The point is to put each dollar to work, twenty-four hours a day and each day in the year, earning more income for you. Your ability to "spare" these dollars for such a proposition will be a surprising increase in your "spending" power that is your ability to save. You will be able to see why you own a home, the security of steady earnings, and so on, are going to stand you in such good stead later in life. But in order that your future income may be ready when you need it, start to build that income now.

The word "investment" should be broadly interpreted to include not only bank accounts and securities, but insurance policies, your own home, real estate, mortgages, and other forms of capital. Life insurance is indeed important. It not only helps people to save, but it is a protection as well as an investment. Every person should carry life insurance, but, on the other hand, it is better to pay a widow or child a steady stream of income in insurance. Follow instead the practice of diversifying your investments, and part in a savings account, part in life insurance, and part in sound securities.

However, this advice about investing is almost valueless if it is to be only a temporary effort, or if you allow your investments to be trifled away through carelessness or greed for more. Rather turn to the fundamental sources of assured income.

And, above all, turn to hard work, initiative and perseverance, as the right means of accumulating sufficient funds for your needs, rather than the practice of buying into the market in the hope of getting something for nothing. Only, carry out the old "good advice" with contentment is great gain." in your finances as well as in the rest of your life.

## Huge Power Projects

### Millions To Be Spent in Next Three Years On Hydro Development

More than \$100,000,000 will be spent in each of the next three years on power projects in Quebec and Ontario in Canada. Although there are other plans for important building projects, none will have a more intimate bearing upon the industrial development of Canada than those now contemplated by the electric industry.

The present turbine installation in the Dominion averages 583 horsepower per thousand of population, a figure which places Canada at the leading margin of the world in per capita utilization of water-power. The total installation now amounts to 1,700,000 horsepower, or an installed capacity of over 3,000,000 horsepower, which probably will be made within the next five years. Quebec has the largest installation with an average of nearly one horsepower per capita, followed by Alberta, with 1,200 horsepower, and in 1929, the power companies in that province generated over six billion kilowatt hours, or one-tenth of the total production in the Dominion. Manitoba has an installation of over 300,000 horse-power, and Alberta, 70,000 horse-power. On the Pacific coast, large hydroelectric installations with a capacity of 560,000 horse-power have been installed in British Columbia.

## Is Baby Teething?

Toothache time is a time of worry to most mothers. The baby is nervous, fretful, feverish. His little mouth is sore, causing constipation and sometimes convulsions, as in—neither baby nor tooth.

These troubles can be quickly banished, however, by taking Mrs. Louis Grubb's Tablets, which Mrs. Louis Grubb, of Teeswater, Ont., has been giving to all my babies while teething and have found them a splendid medicine.

Mrs. Grubb's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box. On the Dr. Willmarth Medicine Co., Brockville, Ont.

## Russian Laws On Religion

### Teaching Of Religion In Schools Is A Punishable Offense

Extracts from the Russian laws on religion, compiled by the British Embassy in Moscow, are summarized in an official government "white paper."

The publication was in fulfillment of a promise given to the Conservative party by the Russian Government when groups of Great Britain and other nations were protesting against alleged religious persecution in Russia.

The "white paper" cites a provision of the Soviet constitution providing for the separation of church and state, and of schools from church, while guaranteeing liberty of religion, conscience and freedom of religious propaganda.

It also quotes a provision of the criminal code by which the teaching of religious beliefs in schools to young children and persons under age is punishable by a year of confinement.

Project the child from the ravages of worms by using Mother Grubb's Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

## B.C. Hydro Development

Possibilities of developing 3,000,000 horsepower from rivers along the coast district of British Columbia is disclosed by engineers.

## First Trans-Continental Level

The first trans-continental level of precise levels was completed by the Geological Survey of Canada in 1916.

## TWICE BENEFITED BY SAME REMEDY

### Recommends Lydia E. Pinkham's Vegetable Compound

Cobourg Ontario—"Year ago when I had a sick father and a nursing baby to care for, I took Lydia E. Pinkham's Vegetable Compound. It helped me to get strength to do my work. And I am still in good health. At Change of Life, I had aches and pains in my back and felt tired all the time. I took Lydia E. Pinkham's Vegetable Compound and felt like a new woman. I recommend it to all women."

## UNIVERSITY OF MANITOBA

## WINNIPEG

Offers, among others, the following courses:

Through its FACULTY OF ARTS students may take the degrees of B.A. and M.A., and B.Sc. Through its FACULTY OF NURSING students may take the B.Sc. courses leading to the degrees of B.Sc. and B.Ed. Through its FACULTY OF MEDICAL SCIENCES courses leading to the degree of B.Sc. Through its FACULTY OF AGRICULTURE students may take the B.Sc. courses leading to the degree of B.Sc. Through MANITOBA LAW SCHOOL students may take the B.Sc. leading to the degree of LL.B.

For further details of courses and other information, apply to J. SPENCE, Registrar, University of Manitoba, Winnipeg.

WORLD HAPPENINGS  
BRIEFLY TOLD

The first member of the Canadian navy to qualify for pension is Charles J. Hill. He enlisted in 1913.

The election of King Carlos II. of Paraguay has been definitely postponed, and will take place in the spring of 1931. Queen Helen plans a prolonged absence on a journey.

An order sheet of the Fragmentary states that the total debt in Italy, of the monarchs of July 23, numbered only 1,473, in contrast to the previous official total of 2,142.

The Canadian Wheat Pool now has a membership of 142,000; the number of members has increased by more than 2,600 in the year, according to Gillis Perrell, of the Canadian Press.

Drastic action to end the recent horde of silver coin from Russia has been taken by the Soviet police. Four men, convicted of counter-revolutionary activities, were arrested and shot. They were a speculator, a banker, two traders.

The damping of oil refineries in the United States, company after company, in the Canadian market has severely hit local oil refineries. Toronto refineries have been forced to lay off from 25 to 50 per cent because of the dumping of oil.

In a further effort to bring before the people of the province the great variety of the products of farms and factory, the Manitoba-Saskatchewan branch of the Winnipeg Industrial Development Bureau is staging an extensive publicity program.

Records at Meridian Cabin, at the entrance of Prince Albert National Park, show that the park has been the Saskatchewan playground since the opening of the present season. Park officials are confident the 1930 total will reach, if not exceed, 20,000 visitors.

Development of a petrified forest six miles east of Drumheller, Alberta, was discussed by the Drumheller town planning commission and a royal commission made to the Parks Development Board of Alberta that a survey of the bad lands in the vicinity be made with a view to the creation of a national park.

**Canadian Cheese Grading**

This will be a great improvement of the quality of cheese year by year since grading was undertaken by the Department of Agriculture at Ottawa, about seven years ago. The chief of the division of dairy products says that the department states that a new mark has been set in 1929 when 83.1 per cent graded were found to be of first grade.

**Technical School For Saskatoon**

Technical education in Saskatchewan will be promoted by a new technical college in Saskatoon which will afford accommodation for a thousand students.

London is to have a children's museum, containing toys and clothes of children of all ages and races.

Ruins of streets, shops and villas of one section of ancient Carthage are being excavated.

Memorial To Ben Egleton  
Her Pioneer Aviator

Alaska's memorial to her pioneer aviator, Col. Ben Egleton, will be a \$100,000 aeronautical engineering building at the Alaska Institute of Technology. The building will far surpass north college in the world.

The campaign to raise the fund for its erection is being sponsored by the American Legion posts of Alaska. Col. Egleton, Captain D. Dennis Baker, Post No. 11, of Fairbanks, Alaska, whose flag Egleton carried on his flight with Sir Hubert Wilkins over the North Pole, has sent a telegram to Post No. 11 from Barrow to Spitsbergen.

Since the finding, last February, of the bodies of Egleton and his mechanic, Earl Borland, who were instantly killed when their plane crashed on the way to rescue passengers and cargo from the ice-trapped ship Nanuk, there has been a growing sentiment in Alaska to establish an appropriate monument to Egleton's memory.

## Western Fish Hatcheries

Distribution Of Fry For 1930 Season  
25 Per Cent Higher Than In 1929

Distribution of whitish fry from the Prairie Provinces' hatcheries of the fish culture division of the Dominion Department of Fisheries, for the 1930 season, has been over 25 per cent higher than in 1929, but, being 217,314,000. The fry have been distributed in the free swimming stage, in the waters of Manitoba, Saskatchewan and Alberta. The Prairie hatcheries handling whitish are at Gull Harbor, Man.; Winnipegosis, Man.; Port Qu'Appelle, Sask., and Lesser Slave Lake, Alberta.

The damping of oil refineries in the United States, company after company, in the Canadian market has severely hit local oil refineries. Toronto refineries have been forced to lay off from 25 to 50 per cent because of the dumping of oil.

## JUDGES FOR CANADIAN NATIONAL COMMUNITY PROGRESS COMPETITIONS

Outstanding men and women, conversant with conditions throughout the prairie provinces, who have been selected by the Canadian National Railways to judge competitions among rural communities in the three prairie provinces, which are of European origin, to be held annually for a period of five years, with three substantial prizes of \$1,000.00, \$500.00, and \$200.00 respectively, to be awarded each year in each of these provinces.

## SUNDAY SCHOOL LESSON

AUGUST 31

## AMOS—A HERDSMAN CALLED OF GOD TO BE A PROPHET

Golden Text: "I heard the voice of the Lord, saying, 'Whom shall I send, and who will go?' Then I said, Here am I; send me." —John 3:7.

Lesson: The Book of Amos.

Devotional Reading: Isaiah 53:7-10.

## Explanations and Comments

The Time of Amos' Prophecy 13: Amos was a herdsman of Tekoa (a small village in Judah), which was in the second century B.C. in the reign of Uzziah, king of Judah, and Jeroboam III, king of Israel. Amos' reign forty-five years in Judah (782-737 B.C.) and somewhere in that time he became a prophet.

Amos' prophecy is startling and devastating that the Judeans did evil events from it, just as they did in Egypt. Amos' message of deliverance from Egypt. It was probably 750 B.C. two years before the same event. The first chapter in the book, the first of all the prophetic books, which is not called "the father of the prophets," contains the words the rumbling of the coming shock is heard. Sharp ears, however, must be used to hear it. To Amos' age most of those days, society must have seemed ample enough, though it was not. The first chapter in the second had been marked by peace and prosperity. But not for long.

It was the beginning of the end. The edges of the fields and in the villages of Amos knew that it would be that. Indeed, in the burden of his message, Amos' prophecy is that the edges of the fields where the native grasses grow, because it is in these native grasses that the insect usually lives over during the winter.

Then in the morning, the yacht was seen drifting towards the harbor at Bremerton. Boats put out and were able to save him from crashing into the harbor wall. The boys were lying, helpless and frightened, in the cabin.

A waterman sailed the yacht back to the harbor, where the yacht was seized by the owner, Major W. J. Edwards, of the Essex Yacht Club, and he interceded in a motor launch.

## Guard Against Theft

of extreme drought.

## The Wheat Stem Sawfly

By Major H. G. L. Strange, Director Agricultural Research Branch, Department of Agriculture, Canada.

This insect, which up till 1914 had only been the cause of a comparatively small amount of damage in Western Canada, and then in Manitoba alone, has since that date rapidly spread to Saskatchewan and Alberta, and is now damaging crops almost up to the Rockies.

Entomologists who have given the sawfly a great deal of investigation and study, are of the opinion that the wheat stem sawfly is a pest greater to stay, and that the control or partial control of sawflies will have to be one of the operations of the wheat grower who wants to maintain his crop in a sound condition.

The wheat stem sawfly normally feeds in the prairie grasses, but of late years has developed a liking for wheat, and is damaging crops and causing damage to wheat in larger numbers every year, until today the losses due to the sawfly are estimated to run into millions of bushels per annum in each of the provinces of Manitoba, Saskatchewan and Alberta.

Neglect of any attempt to control the sawfly has resulted in some years in from seventy to one hundred per cent loss in certain districts in the west.

Prominently, however, in the majority of wheat growing districts at the present moment, the wheat stem sawfly only operates and damages wheat around the edges of the field, particularly around the edges of those fields which are growing a crop of stubble.

Entomologists who have given particular study to the sawfly are of the opinion that the results of the field investigations and experiments, that no cultural methods are really very effective in the control of this insect pest.

They have found, however, that there is a point in the damage to wheat when it is time to avoid any damage whatever.

This is by the seedling of what is called a "trap crop" around the edges of the fields, and in addition around the edges of any stubble fields or around the edges of the fields where the native grasses grow, because it is in these native grasses that the insect usually lives over during the winter.

Then in the morning, the yacht was seen drifting towards the harbor at Bremerton. Boats put out and were able to save him from crashing into the harbor wall. The boys were lying, helpless and frightened, in the cabin.

A waterman sailed the yacht back to the harbor, where the yacht was seized by the owner, Major W. J. Edwards, of the Essex Yacht Club, and he interceded in a motor launch.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE  
THE ORIGINAL GLASS SUBSTITUTE  
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and live stock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.  
51 Wellington St. W. TORONTO, ONT.

## BOILS GO OVERNIGHT

"Many boils on neck. Doctor said not to worry. So I took a bath and raised overnight." C. F. Scott, 1000 Block, 10th Street, Winnipeg.

assure us that the boles from sawfly damage will steadily increase.

Sometimes a crop that is known to be affected with sawflies can be saved by cutting the grain before the infestation starts, and then cutting the stubble after the sawfly has been cut out by the sawfly. This, however, is only a temporary method, because the grade of the threshed grain is usually reduced.

Wheat growers should note carefully those fields which are damaged this fall and take means to combat the pest for next year.

University Division Experimental Farms and Government Departments of Agriculture will gladly supply further details of this damage pest.

## An Amazing Exploit

Two Young Boys Set Out To Sea In A Stolen Yacht

An amateur exploit by two London, England, boys, aged twelve and thirteen, who set out to sea in a sloop, which was stolen off Leith. On board the sloop were two young boys, revealed recently.

The boys who lived at Horsey, fifteen miles from the racing port of Great Yarmouth, and who had been racing over the mud to the racing yacht "Nomad," which was stolen off Leith, lay down to sleep until the tide rose.

When the "Nomad" was afloat, they cast off the moorings, hoisted the mainsail a few feet, and with the tide rising, they were soon over the mud to the racing port of Great Yarmouth.

They waited until dark, and then crept over the mud to the racing port of Great Yarmouth, and were soon over the mud to the racing port of Great Yarmouth.

They lay a make a very good "trap crop," however, that they could not get to Dover and return, that their school mates would acclaim them as heroes.

But the plan miscarried. The yacht dashed helplessly about the Thames estuary, all through the night. Liner constantly passed her, and the boatmen who were narrowly escaped being run over.

Then, in the morning, the yacht was seen drifting towards the harbor at Bremerton. Boats put out and were able to save him from crashing into the harbor wall. The boys were lying, helpless and frightened, in the cabin.

Major W. J. Edwards, of the Essex Yacht Club, and he interceded in a motor launch.

## ARMY OF MEN OUT OF WORK EAST AND WEST

Ottawa, Ont.—In 84 centres which have been set up the quantity of men now registered as unemployed in the Dominion, Minister of Labour, Mr. Robertson, says there are 112,904 people out of work in Canada and it is estimated this number will increase to 159,000 during the winter. Mr. Robertson gave these figures to the Employment Service Council, of Canada, at the opening of the annual meeting.

The figures, he pointed out, did not include 14,000 centrales which had not reported, the number who were out of work in numerous small centres throughout the country, and in rural areas.

Senator Robertson said he considered the figures received a conservative estimate and that it was reasonable to say, he added, that there were now 200,000 people out of work in Canada. Figures compiled on August 15, he stated, showed out of 205,287 men registered in Canada, 26,795, or 10 per cent., were out of work.

The Government of Canada does not propose to adopt paternalism as a policy in dealing with unemployment, but it proposes to help those who are out of work in their districts. Senator Robertson declared.

"I do not for one moment suggest," he said, "that the present unemployment is due to any government or lack of government, but it is an employment problem not a merely Canadian problem. It is world wide. But it is not the business of the government of Canada to look after the welfare of the people. It is the business of the government to let the people of Canada and assist them to look after themselves."

A proposal has just been made to me that if the federal grants for technical education were reduced it would be given to the unemployed. I do not know what the government will do because the matter has not been considered. But I do know it would be a mistake to let the unemployed man to improve his skill during the time he is out of work."

"I feel, however, that if the technical education plan as inaugurated some years ago had been carried out to the letter there would not be so much unemployment today."

To the cause of unemployment the minister referred development of labor-saving machinery, particularly in agriculture. The question of immigration, he said, was the question of immigration. Feeling was that it was duty to see that the people of Canada had employment before inviting others to come in the government had taken steps to restrict immigration.

A special session of parliament was being called to deal with the situation. The government proposed to pass legislation enabling it to take over the administration of the provincial and municipal authorities and the co-operation of employers of labor with a view to providing all the employment possible as quickly as it could be done.

## Daughter Born To Duchess Of York At Glamis Castle

Birth Of Daughter To Duchess Of York At Glamis Castle

Glamis, Scotland.—The birth of a daughter to the Duchess of York was announced at Glamis Castle, the home of the royal couple.

The royal mother and the little princess are making highly satisfactory progress according to an official bulletin from the gray old castle.

Newspapers in Britain were rapidly flashed by telegraph to King George and Queen Mary, who are staying at their Norfolk estate of Sandringham.

The baby is the fourth grandchild of the King and Queen. The others are Princess Elizabeth and the two sons of Princess Mary, Countess of Harewood.

John R. Clyne, home secretary of the Labor government, officially tested the royal birth. His son H. E. Boyd, ceremonial secretary to the home office, were both at the castle to attest the birth.

Nurse Bertie, who attended the Duchess and Princess Elizabeth, was with Her Highness. Dr. David Miles, who with Sir Henry Simon, noted London obstetrician, assisted at the birth, has attended the duchess since her childhood.

## New Gold Discovery

Toronto, Ont.—A new gold discovery is reported from the district 40 miles west of Red Lake, and near the Manitoba boundary, and a mining expert has left for the locality to investigate.

W. N. U. 1852

## Salvage Abandoned Planes

Two Planes Of McElaine Party Are Recovered After Enduring Storms Off Winter

Edmonton, Alberta.—Beating the Arctic again, Canadian fliers and airplane have triumphed in a far northern test.

The test constituted a drama in itself. The first flight of the McElaine party was forced to alight in two monoplanes, forced down by fuel shortage, on lonely Dease Point on the Arctic coast, late last autumn. The second flight was while the machines remained intact through winter, enduring storms of whose magnitude none had been met. The final act, just completed, was contained in the salvaging of the machines.

One of the machines, the propeller of Dominion Explorers, Limited. A little over a week ago supplies of gasoline and oil were in the same of the forced landing. The machine, a "giant" monoplane, found to Coppermine River, where, without overhaul, it was placed in service.

On Thursday evening last, Aug. 15, a second machine, the property of Western Canada Airways, was reached by Pilot Buchanan and his mechanic, and on Monday evening, August 18, the machine landed at Macmillan's Bay.

As far as can be seen, the machines suffered no damage through their long stay in the Arctic. Their motors started without difficulty once fuel and oil were provided, and there were no visible evidences of deterioration.

The Western Canada Airways machine will undergo a thorough examination at McMurray to determine if a complete overhaul is necessary.

## Canadian Beef For Britain

### British Market Offers Great Opportunity For Canada

Montreal—Canadian beef will enter the British market for the first time since 1928 with the shipment of 1,000 head of short-horned cattle, herefords and shorthorn steers, bred in Ontario and now consigned to a firm of importers in Manchester.

Most of the steers were raised on the farms of P. J. Henry, of Bicton, Ont., and M. J. Campbell, of Dutton, Ont.

Shipments of livestock believe that the British market, despite the fact that for so far as can be seen, increased, once more offers remarkable opportunities to Canadian breeders, according to Donald Munro, president of M. Morris and Sons. One hundred and sixty thousand pounds of dressed beef were shipped from Canada to the United States last year, but for the future such trade would be expected to be the unfavorable American tariff.

Much of the traffic could, he believes, be diverted to Great Britain. The only competition in the highest grade of beef comes from the steers from the Irish breeders, but it is only seasonal competition and could be met with ease by concentration on the part of Canadian breeders and exporters.

## Control Of Immigration

### Report Of Royal Saskatchewan Commission On Immigration Has Been Submitted

Saskatoon, Sask.—Main outline of the report of the Royal Saskatchewan Commission on Immigration has been submitted to Premier T. M. Anderson, of Saskatchewan, and the full report will be printed immediately on its completion. Dr. W. W. Swanson, chairman, made the report here.

Findings and recommendations of the commission are expected to be unanimous, the chairman indicated. The commissioners have reached understanding on many important issues. In view of the urgency of the question both in Ottawa and at Regina, and because of changes already made in immigration laws, everything possible will be done to have the report brought immediately, so that it may be made available, through the courtesy of the provincial government for the information of members of parliament at Ottawa and Regina.

The investigation has been a thorough one. Hearings have been conducted in all parts of the province. Since the commission was appointed last fall about 475 witnesses have been heard, and personal investigations have been made by the commissioners.

## Plan Relief Work

Toronto, Ont.—A relief department has been made by Hon. William Fullam, Ontario Minister of Lands and Forests, the government is completing a scheme of relief work in Northern Ontario to care of many of the unemployed here, particularly the mill workers who are faced with destitution during the coming winter.

## Proposed Health Insurance

### Compulsory Form Of State Health Insurance Proposed For B.C.

Vancouver, B.C.—Legislation calling for a compulsory form of state health insurance will be placed before the B.C. legislature at its next session, according to reports current at the parliament buildings.

Under the proposed commission on state health and maternity benefits has not yet completed its labors, which have taken its members to all parts of the province, it is expected that its findings will conclude and a special report will be made before the session opens. The report will contain comprehensive recommendations to the legislature on which to frame legislation.

## To Celebrate Victory

### Six Premiers To Attend Conservative Dinner In Toronto

Toronto, Ont.—Six premiers are expected to attend a dinner here in connection with the annual meeting of the Ontario Conservative Association, November 20 and 21.

Hon. R. B. Bennett, Prime Minister of Canada; and Provincial Premiers F. S. Thomas, Quebec; J. T. Richardson, Saskatchewan; G. B. Harrington, Nova Scotia; J. B. M. Baxter, New Brunswick; and G. Howard Ferguson, Ontario, will be present at what is planned to be a celebration of the party's victory at the recent Dominion election.

## SETTLEMENT OF DISPUTES UNDER A WORLD COURT

Parsons, a member of the Toronto Flying Club, and a pilot in the Great War, had flown an amphibious biplane to Wings Beach recently, and in the early days of his flight, he found himself in the Dominions, it is claimed. The engine and propeller are situated overhead.

After considerable tussling, Parsons was able to start the engine, but in getting down he slipped and fell into the whirling blades of the propeller.

Montreal Bank Robbed

Montreal, Que.—A daring and spectacular hold-up was staged here when two armed bandits held up the four employees of the Banque Provinciale, at 413 St. Catherine Street, East, and a customer, and escaped with \$10,000. The bandits, commanding a passing taxicab in their hurry, however, had overlooked \$9,000 which was on a shelf in the teller's booth.

## Elevator Destroyed By Fire

Winnipeg, Man.—Damage estimated at \$75,000 resulted when fire razed the Assiniboin Grain Company elevator at St. Boniface, on the Red River from Winnipeg. The structure was valued at about \$60,000 and it contained 50,000 bushels of barley, property of Wiley, Low and Company, grain merchants. Insurance covers the damage, it is stated.

## THE KING'S DOCTOR

Lord Dawson of Penn, physician to His Majesty King George V, as sketched by Miss Kathleen Shakespear, on board the Canadian Pacific liner "Empress of Australia." Lord Dawson is reputed to have the finest doctor's hands in England, and has the fine features and eyes sometimes recognizable in great artists.

He is looking forward to his first sight of the Rockies and later is going to spend a month in the West.

## PROMINENT MARKSMAN

### Yacht Wrecked Off English Coast

Commodore Eng and Five Others Lose Lives When Vessel Capsizes

Fowey, Cornwall, Eng.—The 22-ton yacht "Islander," wrecked upon the jagged rocks of Lantivet Bay in a violent storm, capsized in the English south coast, caused Commodore Henry Douglas King, a prominent member of parliament, and five other men to death.

With him on board was Captain Fred Richardson, president of the B.C.R.A., who did some sensational shooting at the rifle meet held at Long Branch, Ont. It was said to be the most successful rifle meet ever held in the 600-yard range, winning the lieutenant-governor's match with 118 points.

## Airplane Fatality

### Plot Is Killed Through Falling Into Propeller Blades

Owen Sound, Ont.—A young boy up to the age of 12, was killed when he fell into the whirling blades of the propeller. Prominent airmen believe it is the first fatality of its kind in the history of Dominion aviation.

Parsons, a member of the Toronto Flying Club, and a pilot in the Great War, had flown an amphibious biplane to Wings Beach recently, and in the early days of his flight, he found himself in the Dominions, it is claimed. The engine and propeller are situated overhead.

After considerable tussling, Parsons was able to start the engine, but in getting down he slipped and fell into the whirling blades of the propeller.

This step is the outgrowth of signature by all the British dominions and colonies of a declaration clause binding them to accept comprehensive jurisdiction of the court. Australia's instrument of ratification to the optional clause, the last of the dominions to do so, was signed recently.

Hon. Arthur T. Henderson, foreign secretary, is said already to have opened consultations with the dominions for simultaneous signature of the general convention Sept. 20, in the way that they signed the optional clause last year.

Thirty states, or more than half the league's members, have now voted to accept the optional clause, three have bound themselves to the general act. These are Belgium, Denmark, Norway and Sweden. The French Chamber of Deputies approved it in June, but the senate has not yet acted.

Minister Kent, Eng.—A plea for unification of the Conservative party in an effort to arrest the party's members' split over whom he called "the most ridiculous and contemptible scoundrel" was made by Hon. Winston Churchill at a meeting here. His speech seemed likely to be taken as the signal gun for a Tory-Duruze to defend the labor regime.

Personal and sectional aims should be put aside "to avert the decline and fall of the British Empire," the former leader of the Conservative party said to an audience of 1,000.

Churchill devoted much of his speech to an appeal to the members of his party to support him in his efforts to make good in the new Conservative Government has been handling the Indian situation, particularly the way in which the Patan tribesmen had come down out of the hills and were "most impudent and insulting a famous city" with a large garrison of British and Indian troops.

"Such a lamentable spectacle would have been avoided if we had been more lenient," he exclaimed. "It would almost seem that the same spirit of defeatism in high places which is so rapidly throwing India into chaos, because of the exchequer's delay as they do for us, may also do for us."

Churchill devoted much of his speech to an appeal to the members of his party to support him in his efforts to make good in the new Conservative Government has been handling the Indian situation, particularly the way in which the Patan tribesmen had come down out of the hills and were "most impudent and insulting a famous city" with a large garrison of British and Indian troops.

The officials inspected the first plot of grains to be grown at the Hudson Bay port. They are not far from very rocky soil, and lack of water, but the good soil, good water will make well at the seaboard, he believes.

The officials inspected the first plot of grains to be grown at the Hudson Bay port. They are not far from very rocky soil, and lack of water, but the good soil, good water will make well at the seaboard, he believes.

Mr. Brown, who is supervisor of demonstration farms in western Canada, declares that Hudson Bay climate is not adverse to grain growing, but it is not the right sort of climate, because it is too cold.

Mr. Brown, who is supervisor of demonstration farms in western Canada, declares that Hudson Bay climate is not adverse to grain growing, but it is not the right sort of climate, because it is too cold.

Grains have matured well at several points along the Bay railway this year, Mr. Brown reports.

The former chancellor, who referred to Mahatma Gandhi as "this malevolent fanatic," declared that no proposal of dominion status for India would be even considered by the House of Commons. While saying this, he reaffirmed the "inflexible resolve of Great Britain to aid the Indian people to fit themselves increasingly for the duties of self-government."

He deplored the exclusion of Sir John Simon, who served on the recent parliamentary commission to India, chairman of the commission that recommended the creation of a separate state for India, even though it was not accepted by the House of Commons. While saying this, he reaffirmed the "inflexible resolve of Great Britain to aid the Indian people to fit themselves increasingly for the duties of self-government."
